projects

ux design front-end dev
21 Below

Jan. - Mar. 2018

- Managed the design process, and drove decisions of a functional website prototype for 21 Below that effectively communicated the product's function and brand identity
- Successfully implemented design specifications into development using HTML, CSS, and bootstrap
- Designed and produced screen layouts, color palettes, typography, and user interface elements

ux design
Music Application Redesign

Fall 2017

- Led team of four students in the concept redesign process of a mobile music streaming application
- Drove decisions to transform insights into intuitive, accessible, and easy-to-use designs solutions that made it easier to construct, manage, and search for music
- Contributed in the design process from creating personas and wireframes, to building user-interface mockups and prototypes

ux design
Amtrak Redesign

Fall 2017

- Led team of four students in the concept redesign process of Amtrak's purchasing workflow
- Produced design specifications, scenarios, and user-interface mockups and prototypes
- Successfully produced user-centered solutions that decrease cognitive interference and decreased checkout times

experience

instructional assistant
Cognitive Design Studio

Mar - June 2018

- Worked under Dr. Taylor Jackson Scott for COGS 102C - Cognitive Design Studio
- Assisted in studio preparation, provided design feedback, and graded students' deliverables

ui dev intern
Sapie Space

Feb - May 2018

- Led a team of 3 in a human-centered, contextual based, redesign process of Sapie Space
- Designed and implemented a user-friendly interface that won over the manager's concept of web application workflow
